

BACTER DEO SPRAY

Bacter Deo is a biological activator for the natural elimination of unpleasant odors: it is a mixture of living microorganisms that removes accumulations of organic waste through natural digestion, radically eliminating the source of unpleasant odors present in the environment where animals live, in cat litter. or in the cages of rodents and birds.

Bacter Deo does not carry out its deodorant action by covering bad smells but eliminating them.

Enzymes accelerate the decomposition of organic residues (faeces, urine, vomit etc.) thus preventing the formation of bad odors.

METHOD OF USE

- On cages and litter boxes: clean the tray thoroughly, leaving the bottom slightly wet. Spray a thin layer of Bacter Deo then fill the tray with the usual granulate.
- On floors, terraces, balconies: after removing excess dirt, moisten the surface and spray Bacter Deo on the area to be treated, leave to act for at least 10 minutes, then rinse.
- On fabrics: pre-treat with Bacter Deo before normal washing in the washing machine.
