

LABEL 300

COMPLETE ALKALINE DETERGENT WITH HIGH PERFORMANCES TO BE USED WITH WASH BOTTLES MACHINES

The Food companies that bottle (liquid) or package (solid), are obliged to make the containers free of any element that could damage or render the food injurious.

The machines soak and spray, ensure very high production and, in addition to the effectiveness of a good wash, must ensure a perfect detachment of labels on bottles VAR.

BENEFITS

LABEL 300 is a complete alkaline detergent, it has:

- High wetting power
- High penetrating power
- high emulsifying and dispersing power of the particles forming the dirt (suspension of the particles for a longer time)
- good peptizing power (operates with water of any hardness)
- excellent action of the foam control
- excellent action of the label removing
- great ease of rinsing

The activity of the solution water / detergent make a deep action to remove bacteria, yeasts or molds from the bottles.

SUGGESTIONS FOR USE

To get a good performance it is necessary to have a deep knowledge about the wash-machine in all its work phases:

- 1. Capacity of the bath tank**
 - 2. Temperature of the bath**
 - 3. Contact time detergent / bottles**
 - 4. Correct dosage of the detergent**
- if in doubt, a technician Cititalia can help you**

LABEL 300

- Dilute to 2-3 % LABEL 300 in the immersion tank, replenish if necessary depending on the dirt to eliminate -eg. dirty milk
- fat after 5000/8000 pieces washed or losses for dragging of the solution or overflow from the overfill levels"). Dilute to 0.5-1% after a certain number of
- hours of work. The best solution to maintain constant levels of LABEL 300 is to
- apply automatic dispensers Çititalia

PECULIARITIES: COD. 51D300

Kind of product: Alkaline emulsifying agent

Colour: Old rose

PH: 13 - 14

Flammability Flameproof

Toxicity in solution: Light toxicity in solution. Don't swallow
