

MAK

HIGH POWER LIQUID COMPOUND FOR DISHWASHER

FIELDS OF USE

MAK is a powerful liquid compound for industrial dishwashers specifically formulated to remove stains and greases that remain on the surfaces of plates, cutlery and glasses.

MAK can be dispensed through manual or electronic product feeders for dishwashers.

In the absence of a power supply, MAK can also be entered by hand.

ADVANTAGES

MAK is extremely economical thanks to its concentrated formula.

MAK is a balanced compound that ensures a complete efficacy of action.

MAK is active for both hard and soft water, not damaging the enamel of the finest porcelain or dulling the silver of the cutlery.

RECOMMENDATIONS FOR USE

For the best and cheapest results MAK, it should be dispensed by a detergent distributor similar or equal to those provided on loan for use by CITITALIA, in any case we recommend the use of a dispenser equipped with a calibration knob, seen that this data is directly linked to the hardness parameters of the washing water.

However, it can also be dosed by hand.

FEATURES

Composition: Liquid detergent compound

Flammability: Not flammable
