

NEW GLISTEN rinse agent for dishwasher

USE

NEW GLISTEN is a particular compound for dishwashing liquid specifically formulated to remove stains or streaks remain on the surfaces of dishes, glasses etc ..

NEW GLISTEN can be dispensed through the power supplies of products for dishwasher, manually or electronically.

ADVANTAGES

NEW GLISTEN is extremely economical due to its concentrated formula.

NEW GLISTEN reacts with the salts contained in the water to prevent the deposits on the surfaces to be treated, making them glossy and attractive.

SUGGESTIONS FOR USE

For the best cheapest results **NEW GLISTEN** should be dispensed by a dispenser for rinse agent similar or equal to those provided on loan for use by CITITALIA, in any case we recommend the use of a dispenser equipped with a knob for calibration. Indeed, this is directly linked to the rinsing water hardness parameters.
