

INKJET

SANITIZER FOR CHEMICAL TOILETS

APPLICATION AREAS

INKJET is a particular antimicrobial compound.

INKJET thanks to its particular formula, it is able to act on faeces, urine and eliminate odors emanated from the inside of the collecting tanks of chemical toilets, sanitizing the reservoir.

ADVANTAGES

INKJET ensures a healthy environment.

INKJET is extremely effective against all microorganisms, thus allows to achieve a secure environment, even if the toilets are used by dozens of people.

INKJET is extremely economical due to its concentrated formula.

APPLICATION TIPS

INKJET must be poured into the reservoir after being emptied and before you enter the new water, in the ratio of 0.4 to 0.8%, compared to the volume of water contained in the tank (the quantity of the product is affected by the frequency of emptying and the influx of people)

FEATURES - 51D680 -

Type - antimicrobial for chemical toilets

Color Yellow

Flammability - not flammable

Toxicity - Harmful if swallowed
